

Serial No. 10/763,922

**REMARKS/ARGUMENTS**

This case has been carefully reviewed and analyzed, and reconsideration and favorable action is respectfully requested.

**CLAIM REJECTION UNDER 35 U.S.C. 112**

Claims 1-5 were originally rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement.

Responsive to this, the specification is carefully and completely amended according to the Examiner's instruction and suggestion. In addition, Claims 1-5 are also amended accordingly. In the specification and Claims 1-5, the phrase --hose nozzle-- is used to replace "airbrush". In addition, the specification clearly describes how the connector rotate round the insert notch to form a whirling state. Therefore, it is believed that, by the amendments, the rejection under 35 U.S.C. 112, first paragraph should be removed.

Claims 1-5 were originally rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which Applicant regards as the invention.

Responsive to this, claims 1-5 are amended according to the Examiner's instruction and suggestion. In addition, the specification is also amended accordingly. Therefore, it is believed that, by the amendments, the rejection under 35 U.S.C. 112, second paragraph should be removed and the amended claims 1-5 should be allowable.

In view of the foregoing amendments and remarks, Applicant submits that the application is now in a condition for allowance and such action is respectfully requested. If any points remain in issue, which the Examiner feels could best be resolved by either a personal or a telephone interview, he is urged to contact Applicant's attorney at the exchange listed below.

Respectfully submitted,

Chin-Yuan Chen
